

E-Judi,

a premier, centralized, tech-powered court operations platform poised to address real-time challenges plaguing the Indian judicial system.

23AAC02

APP DEV - AAC '23

Highlights

- ⚖️ streamlines operations, catalyses the democratization of legal landscape
- ⚖️ transparency, accessibility, and efficiency
- ⚖️ forwards the mission of Atmanirbhar Bharat

KEY FEATURES

E-FILING

A powerful digitising tool, virtually recreating the traditional case filing system on a single platform.

COURT CALENDAR

The calendar may act as a roster, automating generation of daily schedules.

CASE STATUS

A search option across databases, case status provides concise information for a case number.

E-REPOSITORY

Serves as a directory to official websites of courts the user might be looking for during in-depth research.

EXPANSION PLANS

- Onboarding E-services of other government agencies
- Calendar shall flag inordinate delays, monitor and cap case adjournments to 3
- Role Based Access Control
- Addition of web crawler
- Model for metrics generation

TECH STACK

Languages: Dart (Flutter), C++, HTML, CSS, etc.
Database/BaaS: Google Firestore and its features

MEET THE TEAM: ASTUTI, SAISREE, SVAPNNIKA, VARSHITH, VITESH (contributions from many others incl law students), Mentored by Padmakshaya (IIIrd Yr) and Steven (IVth Yr)
